

Construction of upgrades and improvements to the North Bergen Municipal Utilities Authority's Woodcliff Wastewater Treatment Facility, located at 7117 River Road in North Bergen, New Jersey, for the total project cost of \$19,892,394 were financed by the New Jersey Environmental Infrastructure Financing Program (NJEIFP). The NJEIFP is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Environmental Infrastructure Trust (Trust) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Trust to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by improving the current operation of the wastewater treatment facility and ensuring that the facility continues to meet or exceed all relevant New Jersey Department of Environmental Protection regulations for residents and businesses in the North Bergen and Guttenberg sewer service area.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
